

I am writing to comment on proceeding 02-278. Please do NOT weaken existing no call laws! The law in Indiana has been FANTASTIC! I used to get anywhere from 4 to 12 calls NIGHTLY! Some nights I had to unplug my phone it was so bad! Since signing up on Indiana's no call list I almost never get a sales call. I haven't gotten one in months. I understand that these companies feel they have a right to call me and others to try and sell us their products. I feel these people are trespassing when they call me. I pay for my phone for the purpose of calling my family and friends. When a sales person calls me they are technically entering my house without my permission and wasting my time. My time with my family is precious to me and my family. DON'T give it away by over riding Indiana's law with something that is weaker or has more exemptions! We DESERVE the right to forbid these types of calls. If I want to buy something I will go find it. I do NOT want someone calling me because they believe they have what I want!
